1	Norma Coombs Elementary	Debra Lucas	Xyler	Green	1	Alma Cielo Livingstone	Bear in Cave	Marker on Paper	8 1/2" x 11"	Xyler was a shy child in my class, reluctant to speak or show his work. The assignment was to draw a favorite animal, and then to upload the drawing on Padlet. I was surprised and amazed to see the strength of design and drawing in this portrayal of a bear in a cave, and how the sweet expression of the bear looks a little like the child. 5	Norma Coombs Elementary	Debra Lucas	Zairy	Ortega	3	Alma Cielo Livingstone	Magical Rock	Ceramics	3" round	I started off with a spear and I flattened it. I was supposed to make a panda but it was too hard. I checked my garden to see if I could get some inspiration. I looked at a weird sunflower so I went to my desk and created my piece. Next was painting! I wanted something interesting so I put all the light colors. And to make it special I tried a new technique (blending all colors) and it came as my favorite. So I added the finishing touches such as dapping the brush on my finger to make spots scattered. I shared it with the padlet. 3	Washington STEAM Multilingual Academy	Dr. Malone	Brooke	Price	8	Terre	The Snow Globe			"I was really inspired by my short story for Ms.Terre's class 'The outside' I believe it was called. It was about people living in a dome and a girl seen someone outside the dome and now she's wondering how to get out and all of that. As I was painting I said it needs some more something so I decided to make it a snow globe on someone's desk. It's not any ordinary snow globe because there's actual people living inside it and the city is floating inside the globe too. I learned a lot from this project for the fact that sci-fi can be anything out of reality, which is so cool and you can make it anything you want. It's like another world you can have at your fingertips all you have to do is either showcase it to others or keep it to yourself. I decided to showcase mine. 6	Washington STEAM Multilingual Academy	Dr. Malone	Zoe	Lorenzana	6	Milnes	Evolution			One of the things that inspired me to make my art piece was the world revolving around us right now. At the moment, it's filled with stress over the pandemic, racism, and violence. The other thing that inspired me to make my art piece was the idea of time travel. The thought of being able to go to the future or past fascinates me. Both of those things are included in my art piece, which is about a person (coming from a world filled with chaos and sadness) stepping into a machine that puts her into a new, evolved place (filled with no panic over a serious illness and people of all races treating each other equally). 8	Washington STEAM Multilingual Academy	Dr. Malone	Hazel	Vukojevich	7	Milnes	The Mind of Octavia Butler			The work of Octavia E. Butler fascinated me ever since I found her book, Kindred, in the science fiction section of a small library in down town LA. In fifth grade I recognized her name on a list of famous people that we had to choose from for a biography project and I learned so much more about her. Now, I go to the same middle school that she went to and am continuing to draw inspiration from her work. My art piece takes interpretations of characters from several of her books, such as Kindred, Wild Seed, and Mind of My Mind, and shows the mind of Octavia E. Butler creating characters and stories. I thought that it would be really interesting to show Octavia E. Butler's story and stories.	Historical/Political	https://drive.google.com/file/d/1DkXRtHqpc2DhWHRhNkpVncd4BstXGMR/view?pli=1

4	Sierra Madre Middle School	Garrett Newsom	Kyla	Dancel	7th	Patrice Yocum	Nanny's Offenda	mixed media sculpture	2 1/2" X 3 1/2"	In honor of my great grandmother, I have created an ofrenda dedicated to her. My family and I called her "Nanny." She was kind and cared very much for her grandchildren. Nanny had small dogs, hence the reason for the dog bowl. She had strong opinions about what she didn't like. The Coca Cola bottles and tea cup resemble her distaste for the beverage. The majority of my family are Christians, and Nanny was no exception. Everyday, she read the Bible which is shown in the ofrenda. She enjoyed creating photo albums which is the reason why her photo has been 'strung' across the ofrenda as you would in a hanging photo display. In loving memory, Great Grandmother Nanny. 5	Sierra Madre Middle School	Garrett Newsom	Kyla	Dancel	7th	Patrice Yocum	The Evolution of my Album Cover - The Promised Neverland	watercolor and pen and ink		After hours of long and hard thinking, I decided to create an album cover for Takahiro Obata's album, The Promised Neverland Original Soundtrack. I was first introduced to his songs in the anime The Promised Neverland, as it was used as background music. The song I decided to focus on is Isabella's Lullaby, which was part of the anime's theme song and had various versions of itself. Throughout the anime, although the core stayed the same, Isabella's Lullaby's thematic development is what inspired me to create this album cover. Starting off as a song used to depict despair and survival, we later find out that the song holds more meaning than what was immediately apparent. Isabella's Lullaby and the soundtrack as a whole delineates humanity, and the emotions we harbor. They can be our greatest flaw, yet be one of our greatest weapons. Holding a similar meaning, the yin and yang of Chinese culture demonstrates what humanity is as a whole, neither purely good, nor purely bad. One day, an innocent child will be tainted by the reality of the world. "Ignorance is bliss," one might say. Water is often associated with life and emotions, the same as blood. However, blood symbolizes both the beginning and end of life.	Emotions	https://drive.google.com/file/d/1SMH8QGha_RapF1D9ns_EdMAMATAP1bq/view

On his right hand is a mask, just like the one I have to wear all the time when I leave my house. The germs on his arms and head represent the Coronavirus. He is from California like me, represented in his bear pajama pants. He is also wearing a button-front shirt so he is ready for a Webex meeting. Covid guy has a pot belly and the buttons of his shirt are straining to stay closed because he has not been to the gym in six months. 7	Sierra Madre Middle School	Garrett Newsom	Samantha	Dudley	8th	Patrice Yocum	Gratitude Poster	pen and ink	18"x24"	I created this artwork for a school project, I thought it would be nice to show thanks to the people who have helped us in this last year. Whether it be informing everyone on certain topics that need to be talked about, like BLM for example, which as personally taught me a lot about what POC and more specifically black people have had to go through throughout history up until now. Or it could be the firefighters who helped us with the large wildfires we had last year. So to show thanks and appreciation to these groups of people, I drew BLM protesters, firefighters, WR protesters, and finally people at the COVID-19 testing sites. 10	Sierra Madre Middle School	Garrett Newsom	Lola	Gomez	8th	Patrice Yocum	I like Me Better	mixed media		<p>I found it really difficult to decide which song I was going to create an album for. I spent hours trying to find inspiration for different songs. My top three choices for album covers were I Like Me Better by LAUV, Radio Gaga by Queen, and Look What You Made Me Do by Taylor Swift. I either envisioned elaborate color schemes or really simple mixtures of colors. For Radio Gaga, I saw fun colors and bright hippy vibes, because when I listen to the song it very upbeat and fun. For I Like Me Better I took inspiration from the original album cover, just a simple blue rose covered in paint, so I took the blue idea and combined different shades of blue. For Look What You Made Me Do I immediately saw a simple dark green snake outlined with black, just by itself. I decided to go with the I Like Me Better by LAUV, because the blue color scheme really spoke to me and I just decided to go for it. The end result is a mixture of different blues and some of my original art. I really liked how this turned out and I'm hoping to get this cover laminated soon.</p>	Emotions	https://drive.google.com/file/d/1c-zxC7gjp7zISW0LJMozhpbvYqim2C/view
11	Sierra Madre Middle School	Garrett Newsom	Anja	Krause	8th	Patrice Yocum	Beethoven Ofrenda	mixed media	12" X 12"	<p>I chose to honor Beethoven because of my musical background. I have been playing piano since I was five years old. I often enjoy playing Beethoven's compositions on the piano because of the beautiful tunes. I think it is incredible how he was able to compose some of the most well-known and beloved music while completely deaf. I used a paper box from Dots Cupcakes as the frame for the ofrenda. I drew a pencil sketch of Beethoven and decided to keep it black and white for historical effect. I created the piano keyboard and sheet music in miniature form and placed the sparkling gold music stand next to them for a three-dimensional effect. A banner with his name ties the whole piece together.</p>	Historical/Political	https://drive.google.com/file/d/1ymW7FmF3u6nNsLWVY3Z7Zp9pFHSb/Wso/view

14	Marshall Fundamental	Dr. Mark Anderson	Wright	London	12	Ms. Johnson (Devette Johnson)	Landscape 1	Photoshop, Digital	16 x 20	My inspiration was myself I took things I've always enjoyed like the moon, pitbulls, aliens, and the ocean. I also included things that made up me like the Aries constellation, myself wearing my favorite red hoodie, the mountains that are behind my home, and BLM on the island because I'm an African American male. I just wanted to express myself and the things I enjoy just to kinda find myself and who I am as a person. I learned a lot about using texture to really express your arts meaning and emotions. Also, I learned new ways to use basic tools like using changing the shape of the eraser tool to get a certain shape or outer texture in the landscape. This project brought a lot of calm and pleasant emotions to me because it wasn't really stressful for me and I was able to reflect on myself which let me remember some great memories with loved ones. I also felt content with myself and gained a lot of self love because I've always loved myself for who I am but to express it all into this project just really made me love it all even more. 15	Marshall Fundamental	Dr. Mark Anderson	Washington	Aaliyah	12	Ms. Johnson (Devette Johnson)	Landscape 2	Photoshop, Digital	16 x 20	My inspiration behind this project was to do something different than what I usually do. I wanted to give myself a challenge of working with only a few colors. From this project I learned to work with different tools to form textures and shapes. I feel this project gives off a calm emotion. It has a lot going on but at the same time it's very subtle.	Landscape	https://drive.google.com/file/d/1W2yibJGuV-A2Gjmv0Q0WUJxJ4BhYRN/view?usp=sharing

16	Marshall Fundamental	Dr. Mark Anderson	Lopez	Esteban	12	Ms. Johnson	Landscape 3	Photoshop, Digital	16 x 20	<p>My inspiration behind the design and background of the project was a Japanese nature area, honestly I only did it because it was from a game series that I enjoy. With the girl sitting there being one of the protagonists of it, so I just decided to do it with her, because it reminded me of one of the levels from the game backgrounds.</p> <p>I learned from this project after I did it, that tree branches are more spread out and diverse. Also the fact that the multiply tool cant completely change the color of something, and I learned a little about blending the ground, which im still not good at, but if you were to turn off the entire leaf layer it would be a kind of blended ground.</p> <p>The emotion I got from this project was calming because it was one of the projects I've had the most control over, with no specific goal in mind, other than being something in nature. So I decided to make my own spin on it and thats how I did it. Other than that I was annoyed because I waited till the last minute, and that was a pain, but other than that all was good.</p>	Anime	https://drive.google.com/file/d/1y8u6EDp97mD3YlCVmwXGTP4F1Baw4/view?usp=sharing

My dad got the pin from my Great-grandma to give to me, it reminds me of her. This assignment required that the student describe the item visually and verbally. The antique features of the pin inspired me to make the lines not as neat to give an old appearance. I learned that drawing objects you see in the room isn't as easy as I thought but still enjoyable. This project made me happy and calm, I will probably attempt at drawing more items around my house.</p>	Family	https://drive.google.com/file/d/1QOjT9BAUj5RnZcQBTQQTfNhbuzgcJ8o/view?usp=sharing
18	Marshall Fundamental	Dr. Mark Anderson	Enriquez	Fabian	12	Ms. Johnson	Landscape 4	Photoshop, Digital	16 x 20	<p>Inspiration: The idea was to first be able to recreate the small village, based on real-life Chinese architecture, but I wanted to do something a little different. What if this was on a floating island like a Sci-Fi movie scene, I needed to set up the environment, adding some stars in the background and a planet in the distance, emphasizing the depth with the void of space. Eventually, the more I worked on the project, the more invested I was in adding more details.</p> <p>Learned from the project: I was able to practice a lot of lighting and shading throughout the elaboration of the project. I wanted to create perspective as well, and sizing, as well as checking proportions, was essential in making the project look credible. The hardest part, yet most fun but time-consuming process, was adding proper lighting on the structures on the island, the hills, and the crystals floating in space.</p> <p>Emotion: I felt a sense of calm and tranquility from the project, I didnt want to add too many objects to the scene because that would upset the balance in the project, probably becoming overwhelming if more rocks or stars were added. Overall, I found tranquility and peace from the project, it is a little chaotic in some parts, but I still found it interesting and hoped it inspired curiosity in the observer.</p>	Outerspace	https://drive.google.com/file/d/1Y9ctLOt99FD0bRn8g9Wwn7GHyaXNFz/view?usp=sharing
19	Marshall Fundamental	Dr. Mark Anderson	Issac	Graham	8	Ms. Daarina (Daarina Abdu-Samad)	"The Grand Gathering"	Digital Collage	2,500px * 688px	<p>The artwork, "The Grand Gathering", shows a wide landscape of strange and wonderful creatures. To the left portion, there is a gathering of 7 creatures all around an ice table with various riches upon it. In front of the creatures, there are several flowers, and behind them are what appear to be graphing calculators and several trees. These creatures are as follows: a mythical lion type creature, the queen of the ourobori, a phoenix, a 7 headed dragon and lion, and finally a fire lady. To the left and right are a mountain composed of ice, topped by cinnabar, and a mountain composed of coal, with a shack at the top. Then again to the right portion, there is a wasteland where a hero, named Sputnik, is fighting the tyrant leader of the Ourobori religious group, Children of the Self-Eating Serpent. There is also a large creature in the distance, looking out upon the land. The artwork was created digitally by collaging various images together. "The Grand Gathering" was made with various references in mind, such as the text on top referring to a few traditional proverbs or the lion drinking of the chalice. The goal for the artist was to create an artwork showing their goals and aspirations, which they did very well. Overall, the artwork was well crafted and is aesthetically pleasing.</p>	Science Fiction	https://drive.google.com/file/d/1dH17Hxoy0HC0Sd4BEB1SxokHHPzu24/view
